Finance Background — What CloakRFQ Is About

— WHY THIS NEEDS A NEW WORKFLOW

Top 3 Problems CloakRFQ Solves

Today, privacy and competitive financing pull in opposite directions.

01

Sensitive information is overshared

Debtor data, deal terms, and funding context travel too far.

CLOAKRFQ HELPS BY

Purpose-limited disclosure

02

Private competition usually needs a central intermediary

The platform becomes the party that sees the whole quote book.

CLOAKRFQ HELPS BY

No quote-visible operator

03

Execution is disconnected

Quotes, funding evidence, transfer, settlement, and audit live apart.

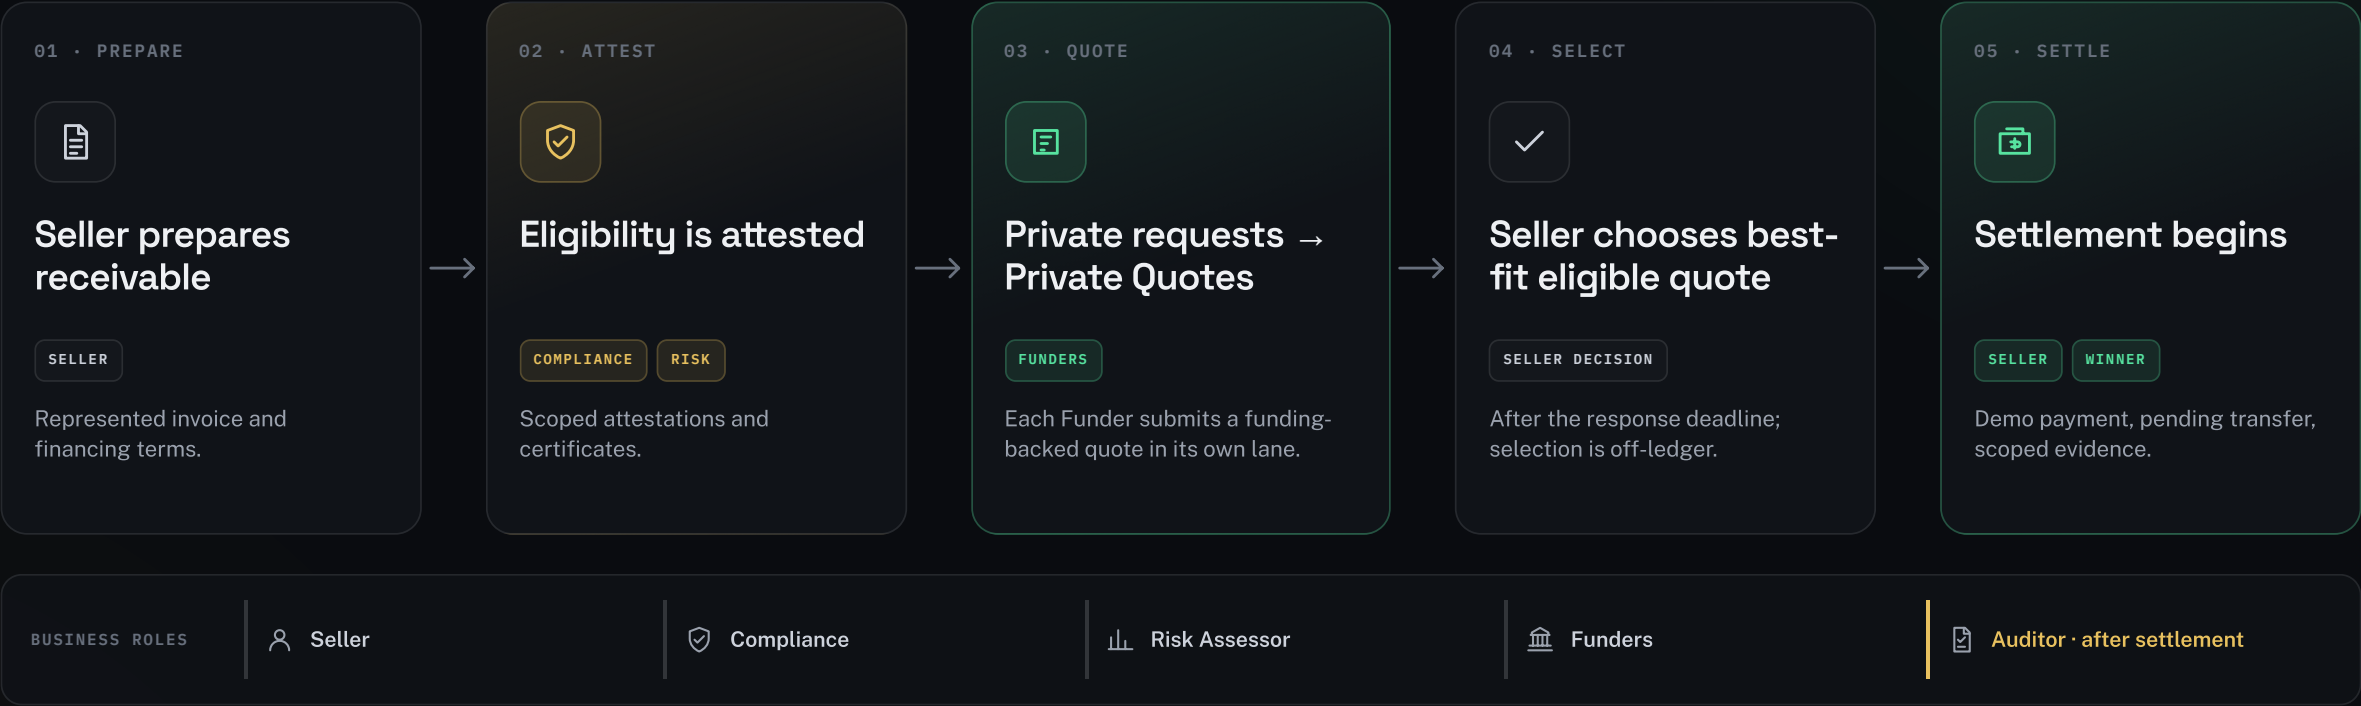

CLOAKRFQ HELPS BY

One coordinated workflow

FIVE STEPS · FIVE ROLES

How CloakRFQ Works

One receivable moves through a role-scoped financing workflow.

— DIFFERENT PARTY · DIFFERENT AUTHORIZED VIEW

Selective Disclosure — Who Sees What

● VISIBLE ● HIDDEN ● CONDITIONAL

ROLE	VISIBLE / ALLOWED	HIDDEN / NOT VISIBLE	DISCLOSURE STATE
 Funder	● Own request + own quote	● Competing quotes	OWN LANE ONLY
 Other Funders	● Their own lane only	● Your request + your quote	ALWAYS PRIVATE
 Coordinator	● Off-ledger status only	● Quote contents	NO QUOTE ACCESS
 Auditor · before	○ Nothing	● Private RFQ visibility	PRE-SETTLEMENT
 Auditor · after	● Scoped ReceivableSaleSettlement	● Quote book + losing Funders	AFTER SETTLEMENT
 Outsider	○ Nothing useful	● All workflow data	NO ENTITLEMENT

Role-scoped Canton disclosure ≠anonymity

No ZK claim. No cryptographic blind-auction claim.

FROM WINNING QUOTE TO SCOPED EVIDENCE

Settlement and Why Canton

CIP-56 DEMO FIXTURE · NOT REAL-MONEY SETTLEMENT

01 · SELLER

Selects winning quote

Off-ledger choice after the response deadline.

02 · ONE DAML TRANSACTION

ATOMIC DEMO PATH

Demo payment settles

SELLER PAID

Pending transfer is created

RECEIVABLE

Scoped evidence is created

AUDITOR

03 · WINNER

Accepts transfer separately

Winning Funder completes Receivable ownership.

- Private competition. Coordinated execution. Scoped evidence.

WHY CANTON

Privacy that shapes the workflow

- Selective disclosure
- Role-based authorization
- Coordinated multi-party workflow
- Scoped auditability
