Finance Background — What CloakRFQ Is About

Receivable

Money a customer owes after goods or services have already been delivered.

SELLER GOAL

Early liquidity without broadcasting the deal

— WHY THIS NEEDS A NEW WORKFLOW

Top 3 Problems CloakRFQ Solves

Today, the Seller often trades privacy for competitive financing.

01

Sensitive information is overshared

The Seller's debtor data, deal terms, and funding context travel too far.

CLOAKRFQ HELPS BY

Purpose-limited disclosure

02

Private competition usually needs a central intermediary

The platform becomes the party that sees the whole quote book.

CLOAKRFQ HELPS BY

No quote-visible operator

03

Execution is disconnected

Quotes, funding evidence, transfer, settlement, and audit live apart.

CLOAKRFQ HELPS BY

One coordinated workflow

FIVE STEPS · FIVE ROLES · ENFORCED ON CANTON

How CloakRFQ Works

One receivable moves through a role-scoped Canton workflow.

— CANTON CONTRACT VISIBILITY · DIFFERENT PARTY · DIFFERENT VIEW

Selective Disclosure — Who Sees What

● VISIBLE ● HIDDEN ● CONDITIONAL

ROLE	VISIBLE / ALLOWED	HIDDEN / NOT VISIBLE	DISCLOSURE STATE
 Funder	● Own RFQRequest + PrivateQuote	● Competing quotes	OWN LANE ONLY
 Other Funders	● Their own lane only	● Your request + your quote	ALWAYS PRIVATE
 Coordinator	● Off-ledger status only	● Quote contents	NO QUOTE ACCESS
 Auditor · before	○ Nothing	● Private RFQ visibility	PRE-SETTLEMENT
 Auditor · after	● Scoped ReceivableSaleSettlement	● Quote book + losing Funders	AFTER SETTLEMENT
 Outsider	○ Nothing useful	● All workflow data	NO ENTITLEMENT

Role-scoped Canton disclosure ≠anonymity

No ZK claim. No cryptographic blind-auction claim.

— CANTON COORDINATION · FROM WINNING QUOTE TO SCOPED EVIDENCE

Settlement and Why Canton

🛡️ CIP-56 DEMO FIXTURE · NOT REAL-MONEY SETTLEMENT

- Private competition without an all-seeing intermediary—made possible by Canton.

WHY CANTON

Privacy that shapes the workflow

- 🔒 Selective disclosure
- 🔒 Role-based authorization
- 🔗 Coordinated multi-party workflow
- 📄 Scoped auditability
